PEASY · CLAUDE SKILLS

From an idea to a review-ready product output.

A shared knowledge pack and two Claude skills — one that drafts a Peasy-consistent prototype, one that drafts a Jira-ready spec. Grounded in Peasy's own code, design system and product rules.

NORTH STAR

A Peasy idea becomes a prototype that reads as Peasy and a spec grounded in actual product decisions. Both marked as drafts. Both traceable to source.

1 DISCOVER — Frame the problem

Pin down what the feature actually asks for before any code moves.

OPENING QUESTIONS

- Who feels the gap?
- What outcome counts as success?
- What already exists we can reuse?
- What would "good" look like?

UNDERSTAND

What the brief actually asks for, in Peasy's own terms.

2 DISCOVER — Read what Peasy is

Inventory the frontend, the tokens, the patterns that already live.

PEASY-FRONTEND

```
src/
  components/
    Button.tsx
    Input.tsx
    Select.tsx
  tokens/
    theme.ts
```

tokens · 8 · Grold

Nieuw product

UNDERSTAND

The system, components and conventions already in the product.

3 DISCOVER — Capture the rules

Resolve logic, states and terminology into one source of truth.

ELECTRICITY · EPIC RULES

- ANB-1303 Create product
- ANB-1304 Edit specification
- ANB-1305 Save & mandatory
- ANB-1307 No-supplier state
- ANB-1347 Duplicate
- ANB-1358 Name uniqueness

NL FR terminology sheet

UNDERSTAND

How logic, states and terms behave across Figma, Jira and the product itself.

4 PACKAGE — Shape the knowledge pack

Package context into something both skills draw from every run.

SHARED PACK

peasy-pack v0.1

- tokens/
- components/
- rules/
- terminology/
- examples/
- do-and-dont/

every entry cites its source

UNDERSTAND

What context the skills need to stay in Peasy's character.

5 PROVE — Prove it on a real screen

Benchmark: can the pack alone rebuild the Electricity Product screen?

SIDE-BY-SIDE · ELECTRICITY LISTING

LIVE	PACK OUTPUT
Peasy	Peasy
Electricity · Gas	Electricity · Gas

86%

UNDERSTAND

Whether the pack alone can reproduce a live Peasy screen.

6 BUILD — Build the skills

Two Peasy skills: one drafts the prototype, one drafts the spec.

TWO SKILLS, ONE PACK

D Peasy Design
`brief → <Prototype />`

R Peasy Requirements
`brief → ANB-13XX`

UNDERSTAND

Where shared context ends and skill-specific judgement begins.

7 STRETCH — Stretch to a new workflow

Different shape, same bar: product duplication from scratch.

DUPLICATE PRODUCT · TEST

Duplicate ANB-1347

Productnaam NL	*empty*
Productnaam FR	*empty*
Leverancier	ENGIE
In vergelijking	Nee

- Names start empty
- Supplier preserved
- Comparison default Nee
- Case-insensitive name unique

UNDERSTAND

Whether the approach holds beyond one screen and one shape.

Signals each stage is actually done

Not deadlines — things that are either true or they aren't.

1 Frame
- Problem stated in one paragraph
- Scope agreed in writing
- Open questions logged

2 Read
- Component catalogue in writing
- Token file located
- Gaps listed, not hidden

3 Capture
- Every rule cites its ANB ticket
- NL & FR terminology aligned
- Conflicts flagged for review

4 Shape
- peasy-pack tagged v0.1
- Zero orphan entries
- Reviewed before use

5 Prove
- Fidelity score recorded
- Deviations enumerated
- Pack gaps fed back

6 Build
- Both skills reach the baseline
- Uncertainty surfaced in output
- Every claim traceable

7 Stretch
- ANB-1347 duplication passes
- Rule exceptions respected
- Maintenance owner named

END TO END — IN ONE SITTING

A new idea → Peasy knowledge → Claude Skills → Prototype + spec → Human review → Peasy adopts
